Installation Notes

Standard and Bespoke

When installing the unit a 150mm gap is required between the headrail and the ceiling or soffit for fixing. Therefore the unit should be installed prior to the soffit when taking the unit to ceiling height or making the enclosure steam proof.

Bespoke only

When installing into a pre-existing aperture the headrail can be installed from below on request. When fixing from below the door must be wider than the inline panel. This must be specified when the order is placed.
